

Heritage Partnerships Program in Wyoming

The National Park Service is about more than just parks. The Heritage Partnerships Program of the NPS Intermountain Region helps community groups, local, state and federal agencies, tribal governments, nonprofits, and individuals identify, recognize and preserve national treasures that are located outside of our system of national parks.

The Heritage Partnerships Program (HPP) offers a wide range of services that can be tailored to meet the needs of an individual project. NPS professional staff includes historians, historical architects, and archeologists who assist project leaders in the preservation of our Nation's most significant places. HPP helps communities and groups identify nationally significant resources; prepare National Historic Landmark (NHL) nominations and historical reports; conduct archeological and architectural surveys; complete treatment plans for stabilization and repair; and create planning and education materials.

HPP comprises several programs, including the National Historic Landmarks; Historic American Buildings Survey (HABS), Historic American Engineering Record (HAER), and Historic American Landscapes Survey (HALS) documentation programs; the National Heritage Areas Program; Historic Surplus Property Program; and the Japanese American Confinement Sites Grant Program. In 2016, HPP supported a variety of projects in Wyoming, including:

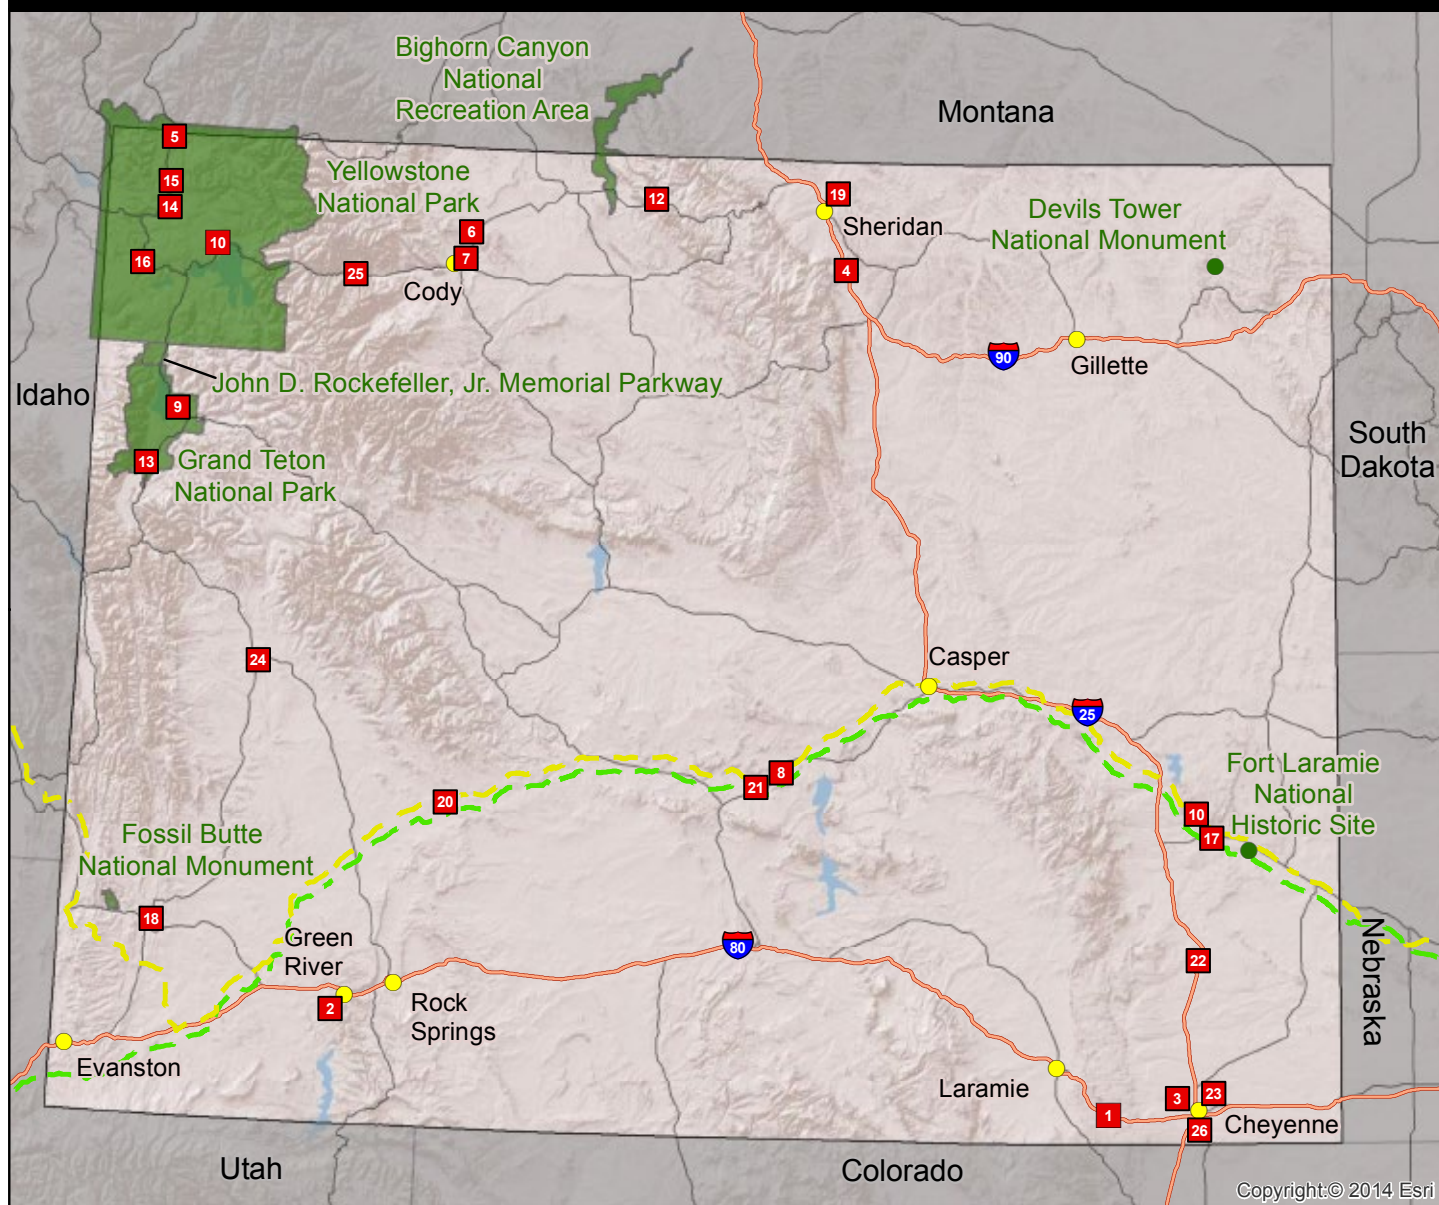

- **Ames Monument and Hell Gap Paleoindian Site NHL nominations, Albany and Goshen counties** – provided technical assistance to the Wyoming State Historic Preservation Office to complete NHL nominations for Ames Monument, a highly significant work of renowned architect Henry Hobson Richardson; and Hell Gap Paleoindian Site, an archeological site that provides an almost continuous record of approximately 4,500 years of Paleoindian subsistence economies.
- **Heart Mountain Root Cellar, Phase II: Emergency Stabilization, Park County** – with a Japanese American Confinement Sites grant, the Heart Mountain, Wyoming Foundation will stabilize the severely deteriorating root cellar built at the Heart Mountain Relocation Center, originally used by incarcerated to store produce.
- **Shoshone Powerplant Digital Documentation and Interpretive Film, Park County** – provided technical assistance to the Bureau of Reclamation and CyArk to digitally document the Shoshone hydroelectric powerplant using laser scanning, GPS, and high-definition photography, resulting in interactive 3D reconstruction, virtual tours of the site, and a short interpretive film.

Ames Monument was dedicated to brothers Oakes and Oliver Ames, Jr., financiers of the Union Pacific Railroad, Albany County, WY. Photo: NHL nomination.
